— Introduction

“When time is fixed, quality is the free variable.”

— Implementation

Determine the smallest possible body of knowledge which, when mastered, give students the broadest possible understanding of the subject.

- Use your tests as an indicator: not on test → not in course
- Look for and focus on the core subjects
- Stay fresh by teaching less, but teaching in depth

Don't weary yourself or your students with too many topics!

“Of making many books there is no end, and much study wearies the body.” – The Teacher, Ecclesiastes 12:12
